If failure occurs while installing our printer driver on Windows 8, please follow the steps as below:

1. Place the mouse in the lower right corner ,
    Choose "SETTINGS"....Select "Change PC Settings".... Then "GENERAL"...... Go to the bottom and select " ADVANCED STARTUP".... Click "RESTART NOW"....Then select "TROUBLESHOOT"-------> "ADVANCED OPTIONS" --------> "STARTUP SETTINGS" and select "RESTART".

2. When the computer reboots, Press the key **7** for "Disable driver signature enforcement".

3. Install our printer driver again. If there is any warning message coming out , please select "**continue anyway**" (like on windows xp,windows vista,windows 7).
