

Happy Hour Setup

ts0211

5d

Hello! I am new with this system and I would like to have someone explain to me how to setup Happy Hour times, please. I have tried to follow some of the instructions on other posts, but they are not helping me. The instructions need to be a bit more specific. I get stuck when I am adding the rule HH Everyday 16-18 because I can't add a second action of the same name. How do I add HHendDay? There isn't a second field to add it.

Mappings

HH Everyday 16-18

Event Name:
Application Started

Custom Constraint List

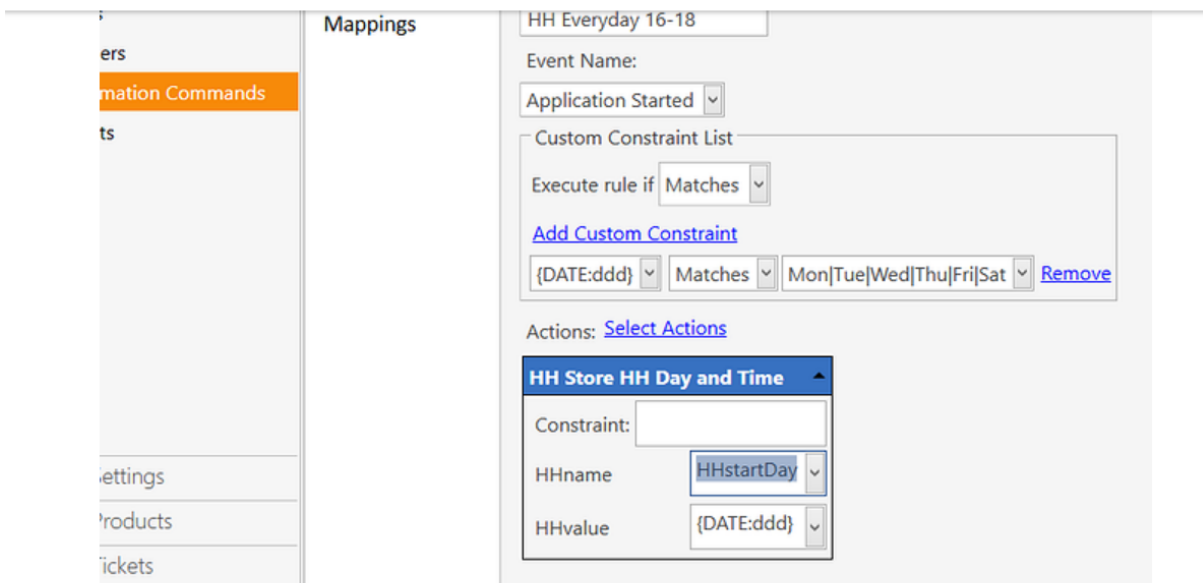

Execute rule if Matches

[Add Custom Constraint](#)

{DATE:ddd} Matches Mon|Tue|Wed|Thu|Fri|Sat [Remove](#)

Actions: [Select Actions](#)

HH Store HH Day and Time

Constraint:

HHname: HHstartDay

HHvalue: {DATE:ddd}

Thank you.

P.S. With screen shots as guides if possible, please.
